Aim: To write a program to check wether the given character is digit,alphabet or special character using <ctype.h>

Source Code:

```
// to check wether character is numeric or alphanumeric
#include<iostream.h>
#include<conio.h>
#include<ctype.h>
void main()
{     char ch;
      clrscr();
      cout<<"Enter the Character :";
      cin>>ch;
      if (isalnum(ch))
      {     if(isalpha(ch))
            cout<<"\nAlphabet Entered ";
            else
            cout<<"\nDigit Enterd";
       }
       else
       cout<<"\nSpecial Character";
       getch();
```

Output:
